Appl. No.: 10/524,710

Amdt. Dated March 19, 2008

Response to Office Action Mailed January 25, 2008

REMARKS:

Applicant appreciates the time and care the examiner has taken in examining the application. In the amendment above, the features of claim 4 have been added to claim 1, and claim 4 has been cancelled. Applicant requests reconsideration of the final rejection of the claims, and states the following in support. For the sake of brevity, arguments in all prior responses to office actions in this application are hereby incorporated by reference in their entirety.

The driver structure as set forth in amended claim 1 comprises a middle projection provided on the blade edge between the projections of the second pair of projections, to hold the crown of the staple when the pair of leg portions pass through the bundle of papers, and further, this middle projection comprises a crown pressing portion to press the crown. It is submitted that taken either alone or together, the cited references, namely, the prior art cited in the specification, fail to adequately disclose such features so as to render the claimed combination obvious. In particular, it is submitted that the crown pressing portion is not disclosed or suggested in the prior art. No *prima facie* case of obviousness of claim 1 as amended has been established. Therefore, it is requested that the rejection be reconsidered and withdrawn.

It is respectfully submitted that the application is in condition for prompt allowance and that all of the objections, rejections and requirements raised in the Office action have been met. Early, favorable treatment of this application is requested.

The examiner is encouraged to telephone the undersigned with any questions or comments so that efforts may be made to resolve any remaining issues.
